The **Deeter** Group®

**Liquid Volume Dispenser**

The Liquid Volume Dispenser is designed for quick and accurate dispensing of a pre-programmed volume of fluid, with one simple click of a button.

The dispensing volume can be easily changed using the push buttons on the front panel.

It can be connected to a PC or external control switch for remote control or monitoring.

A low volume version is available for applications requiring smaller volumes.

John Guest Speedfit connections for easy installation.

**Liquid Volume Dispenser Specifications:**
- Can dispense liquid volumes between 0.1 to 100L
- Selected volume in increments of 0.01L steps
- Will accurately measure volumes over a flow rate of 0.5 to 5L/minute

**Low Volume Liquid Dispenser Specifications:**
- Can dispense liquid volumes between 0.025 to 10L
- Selected volume in increments of 0.001L steps
- Will accurately measure volumes over a flow rate of 0.2 to 2.5L/minute
